

W 8 E D U Bulletin

Case Amateur Radio Club Meeting

Thursday, April 18, 1963

11:10 o'clock in the morning

in the radio club cave in

old main.

W8EDU has been on the air since spring vacation, working mostly 40 meters. Only those who have paid their dues, a small, paltry, summation of funds are permitted to operate. Come and be one of the privileged. One extra requirement: It looks best if you have a license.

For sale: See Chet Slabinski, K8OLB, for a medium-high powered rig on many bands for a few dollars.

See Clyde Walter, K8IBP, for a Home-brew transceiver for 6, still in the experimentation stages. Also, an International Crystal 10 watt modulator, built, running, and ready to go.

Tom Beno has a h-b six meter station. Very neat, very reasonable. He answers to K8UGK.

For Sale: membership in the Case Amateur Radio Club, only 25¢ per month. Includes prestige, comradeship, the feeling of belonging, and the use of a rig.
